H-60 HYDRAULIC FLIGHT CONTROLS

With ASI's tooling and test equipment for the hydraulic flight control components and assemblies we can test hydraulic parts up to 5000 PSI. We have developed repair and overhaul capability for the hydraulic flight controls for all military variants of the H-60 so your fleet can operate with confidence.

SERVOCYLINDERS

ASI offers our customers full capability for overhaul, repair and test all of the servocylinders in the automatic flight control (AFCS) system. Our capabilities on the S70, SH-60 and UH-60 are unparalleled, and our ability to source and manufacture spares to support our programs allows us to offer our customers faster turn times.
