

F-16 AVAILABILITY DELIVERED®

COMPREHENSIVE MISSION READINESS SOLUTIONS FOR THE F-16

AVAILABILITY DELIVERED®

Modular Mission Computer

ASI can support spares and repairs of the F-16 Modular Mission Computer (MMC). The MMC is a critical component that significantly enhances the F-16's operational capabilities. Its modular design, advanced processing power, and extensive functionality ensure that the aircraft can effectively perform a wide range of missions in various operational environments. By integrating and processing vast amounts of sensor data, managing weapon systems, and facilitating secure communications, the MMC provides the pilot with the tools needed to maintain superiority in complex and dynamic combat scenarios.

ASI proudly provides a wide range of products and services to keep F-16s flying efficiently and effectively.

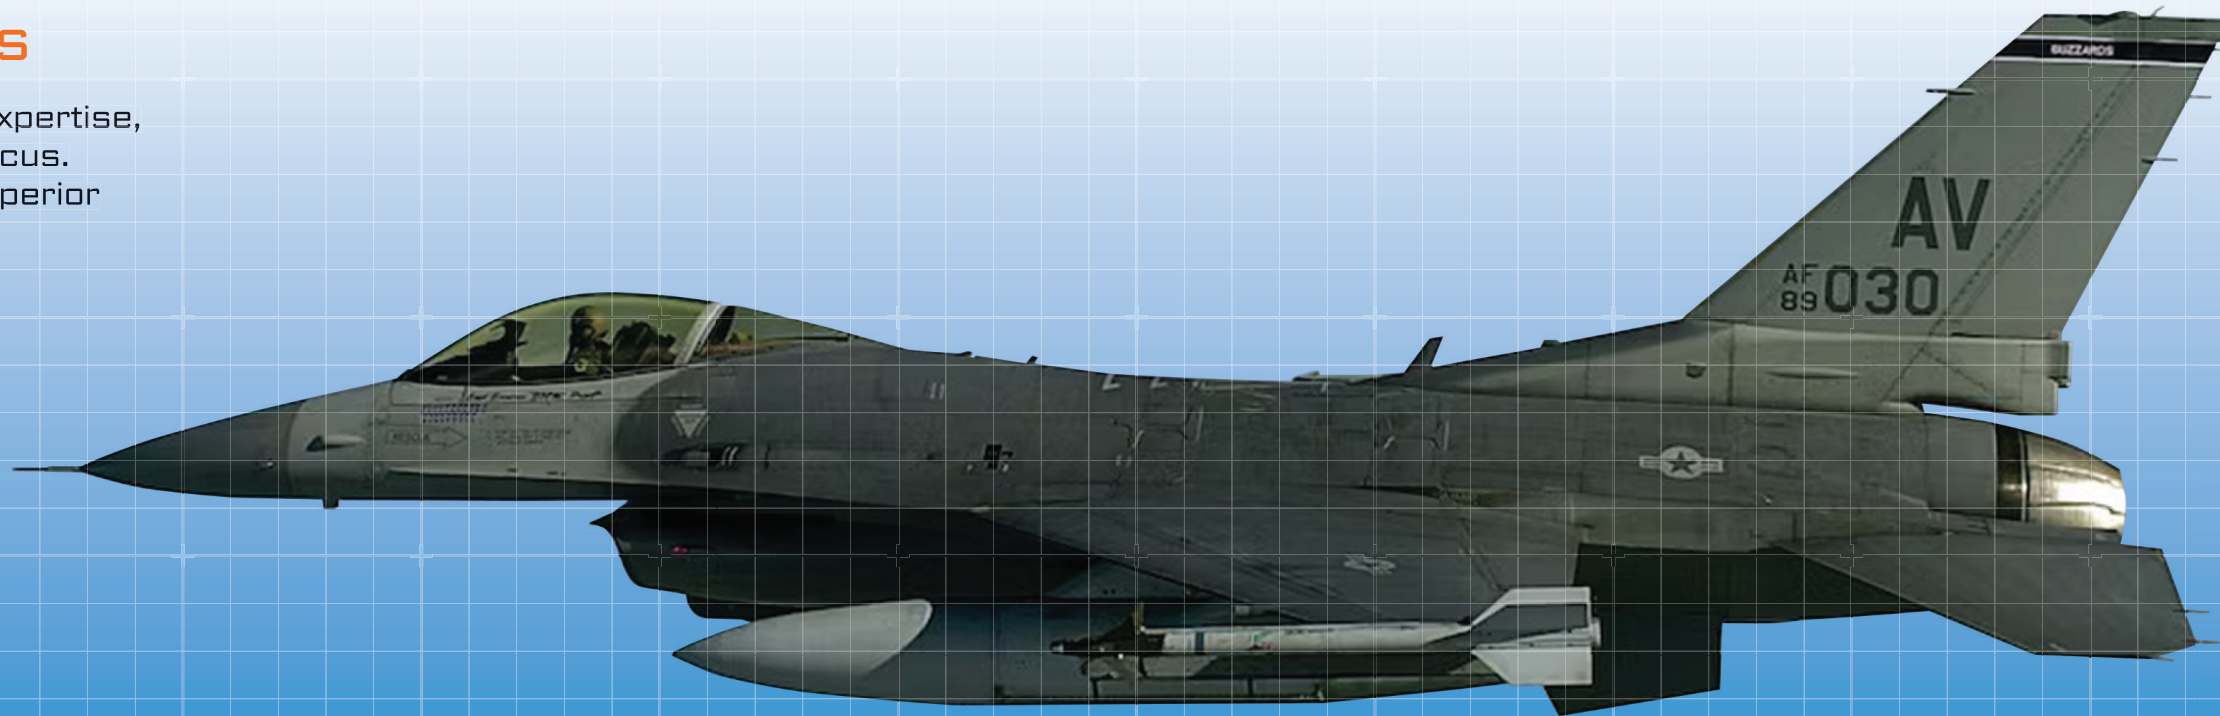

- Airframe
- Avionics/Instruments
- Weapon Systems
- Landing Gear
- Powerplant
